

TH300 Hydrogen Generator

Specifications Hydrogen purity: 99.999%
Hydrogen flowrate: 0-300ml/min
Output pressure: 0-0.4MPa
Power: 150W

- Features:
1. Apply with SPE technology
 2. Apply with imported ion membrane
 3. Using pure water. No alkali solution
 4. Hydrogen pressure and flowrate is controlled automatically.
 5. Automatic control for water level. It stops working when lack of water.
